POWERING COMMUNICATIONS.
CREATING OPPORTUNITIES.

How do you
Power your
communications?

Arbinet offers the broadest choice of innovative solutions to enable efficient and valuable global interconnections.

By leveraging a single interconnect to reach more than...

- 1,000 Voice Members
- 200 Data Members
- 1,300 worldwide destinations
- 75 global broadband networks

Business Efficiency

Arbinet Marketplace Services

Arbinet provides a robust platform for buying and selling voice communications capacity.

Marketplace solutions enable international telecommunications companies to reduce costs, streamline operations, and improve route quality.

Discover opportunities to reach new markets without extensive network build-out.

MarketAccess on theexchangeSM

Utilize theexchange platform to buy and sell global voice traffic, reach 1,300 worldwide destinations and connect with over 1,000 Arbinet Members.

PrivateAccess on theexchangeSM

Expand your relationship opportunities while reducing management complexity.

Market Choice

Arbinet Managed Services

Simplify global termination and back office operations.

By managing pricing, routing, reporting, credit risk and settlement, you can focus on growing core functions.

Arbinet offers a range of flexible, scalable solutions to drive greater business efficiency and interconnection simplicity.

AssuredAccessSM

Simplify global termination with professionally managed A-Z rate sheets optimized for price and quality.

ManagedAccessSM

Gain access to consistent, highly managed, premium quality A-Z termination.

NumberAccessSM

Establish a local presence from virtually anywhere in the world with Direct Inward Dial (DID) numbers.

Routing Intelligence

Arbinet Query Services

Arbinet's patented intelligent routing technology enables Members to efficiently route traffic.

Arbinet identifies the actual terminating carrier rather than the code-implied carrier, in real time, on a call-by-call basis.

By driving routing efficiencies, Arbinet's Query Services increase call quality and reduce costs.

Peering Solutions

Intelligent, flexible services enable improved routing efficiency and multimedia capabilities.

Portability Solutions

Improve mobile termination efficiency with our patented intelligent routing technology.

AccessCodeSM

Optimize route table management with a universal database of valid calling codes.
