

ManagedAxxcessSM

A flexible relationship opens up many opportunities

Arbinet's ManagedAxxcess provides premium quality termination to either hard-to-reach or expensive-to-maintain destinations.

ManagedAxxcess enables carriers to reduce inefficient or uneconomical bilateral arrangements, while maintaining their overall inbound/outbound traffic balance.

ManagedAxxcess utilizes a flexible "virtual bilateral" framework, enabling service providers to pool reciprocal traffic from multiple markets via a single connection with Arbinet.

Manage Complexity, Increase Opportunities

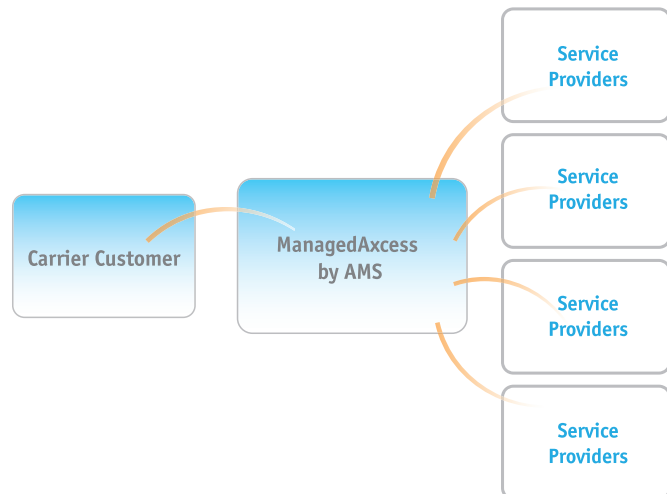

As the global telecommunications marketplace becomes more competitive and complex, retail service providers need a more streamlined and cost-effective process for managing international call termination and executing reciprocal traffic agreements.

Access a broad base of potential partners to increase revenue opportunities and generate potential cost savings. At the same time, avoid juggling too many carrier relationships and interconnections. ManagedAxxcess decreases operational, administrative and technical inefficiencies.

Key Benefits

- Access consistent, highly managed, premium quality A-Z termination
- Avoid rejected calls due to congestion
- Take advantage of flexible contract and settlement terms
- Enjoy safeguards from price increases with five day price protection
- Simple terms with no fees
- Dedicated customer service center available 24x7

Virtual Bilateral Configuration

Select only the highest quality routes

Reduce Operational Costs

ManagedAccess decreases costs by reducing management and facilities expenses for low-volume, high-maintenance destinations. For select destinations, Arbinet aggregates traffic from multiple buyers to provide more competitive pricing.

Direct, Intelligent Routing for Best Quality

ManagedAccess selects only the highest quality routes on Arbinet's exchange or through its own capacity arrangements. To efficiently route calls for the best quality solution, ManagedAccess utilizes Arbinet's patented intelligent routing capabilities.

ManagedAccess routes traffic directly to either an incumbent carrier/PTT or a highly screened, locally interconnected carrier to guarantee premium quality termination. ManagedAccess also facilitates reciprocal traffic arrangements to minimize or eliminate cash outflows.

Dedicated Customer Service

A Major Customer Service Center (MCSC) dedicated to ManagedAccess customers proactively monitors and manages traffic. The MCSC ensures rapid response and delivery of the highest retail quality traffic.

Reduce the number of inefficient bilateral agreements.
